PROJECTS

Sankara Servis App   Jan 2023 - Present

- In Eye Hospital, They conduct a camp for free eye check up , The camp can be placed at any place over India .
- we need to track how many people attend the camp , how may refferd to hospital , how many get glass , how many need surgery , how may succesfully taken surgery .
- For this contineous tracking only we built a webapp .
- Technology used : React , MUI, Github,

Placement Assist Portal   Jan 2022- April 2022

- For College Placement is one of the major part . in that they need to track all the student mark list to calculate grade and how are all elligible to which company .
- Till Now these are manual progress but in this Web App It already reading the student marks . and if any company approch with filter oiption we can easily filter the Student and download it in Excel Format
- For this Students also get email/ whatsapp meassge that these company are going and we are eligible to attend with previous mock interview questions Pdf .
- Technology used : React , MUI, Github,

MATERIAL COST CALCULATION   **FEB 2020 - MAY 2020**

- In industry if they brought raw material is purchased and how the material travelled according with their process ,labor cost , machine cost and lubrication cost.
- Developed with react , and MUI
